COMMUNITY SERVICE

JUDITH LOMBEIDA MEDICAL FOUNDATION

Average hours per week: 40

With the help of the staff from the Hospital Delfina Torres de Concha, we were volunteering during September 2010. The project was in charge of the reconstruction of craniofacial congenital abnormalities as cleft lip, cleft palate and hand surgical care in the community of Esmeraldas-Ecuador, we attend almost 300 hundred children.

We were receiving all the files, preparing, assisting surgeries, and controlling the post surgical outcome.

HOSPITAL DELFINA TORRES DE CONCHA. RURAL AREA / ESMERALDAS â€“ ECUADOR

During August and September 2010 as a primary physician I had to take care of this rural community providing prevention information and management of the most common illnesses of the population. I was also in charge of the outpatient care. Every three days I had shifts in the hospital attending pediatric and adultâ€™s emergencies.
